

Thank You for Purchasing a RELIsm LIFEPAK Device.

This refurbished device offers you a pre-owned LIFEPAK[®] defibrillator renewed to its original highest standards by Physio-Control.

Because we're the original manufacturer, you can trust that your RELI device lives up to our quality standards. No other refurbishment process meets the rigorous quality system in place at Physio-Control. Our unique, performance-driven inspections, expert-trained refurbishing teams, access to original manufacturer parts and service records, and exclusive knowledge of design improvements and fixes mean that no one can ensure the quality, reliability or safety of our refurbished products like we can.

Our unique, RELI process sets us apart from other companies offering previously owned equipment. RELI devices come with:

- The latest operating software
- Current technical service updates
- Reliable service history
- Parts replaced with new OEM parts where needed by factory trained technicians
- Post-purchase technical support
- Field service availability

NOTE: The current Operators Instructions and service manual contain the latest information for this product family. The device you purchased met all applicable requirements when it was manufactured. If you have any questions on applicable standards, please contact Physio-Control.

RELI devices are:

- Fully-tested to Physio-Control quality standards
- Calibrated and tested to the same standard as new LIFEPAK devices

In addition to refurbished devices, we offer a world class field and in-house service team to keep your devices working. Around the world, LIFEPAK defibrillators are used by more health care professionals than any other brand. With over a million LIFEPAK defibrillators distributed worldwide, Physio-Control is the world's leading provider of external defibrillation and monitoring technology for the treatment of sudden cardiac arrest and other cardiorespiratory emergencies.

A wide range of accessories and disposables can be purchased separately.
